

Concierge Profile: make the PDF match v6

1 • Why it doesn't look like v6

1. **It was restyled from v3, not rebuilt from v6.** The file header still reads "design: Concierge Property Profile v3". v3's parts were kept (Head title + lede sentence, grey-filled KV rows, Tile grids, Absent boxes, a navy footer bar) and given v6's fonts. v6 has none of those parts.
2. **Pixels were used as points.** v6 is 816 px wide; a letter PDF is 612 pt. Every v6 number has to be multiplied by **0.75**. The map was set to 250 pt when it should be 187.5 pt, which is why page 6 overflowed and the criteria were moved to page 8.
3. **Code comments overrode settled decisions:** the price per sq ft source, the disclaimer wording, the "Assessment data only" box, and the sentence ledes. Each one is reversed in section 4.
4. **My error:** v6 page 4 showed PAID badges on the installments, which breaks the no-payment-status rule. They're now removed from v6 and from the package copy.

The fix: delete Head, KV, Tile, Absent, the s.bar and s.footer styles and the FILL row pattern. Rebuild all eight pages from the six parts in section 2, in the order in section 3. Keep all the data logic as it is: `derive.ts`, `resolveTaxLayer`, `pagesFor/pageNo`, the status masking, the homeowner's-only exemption, and the fonts.

2 • The six parts, in points

These are v6 values multiplied by 0.75. H = Montserrat, W = Work Sans. Side margin is **42 pt** on every page (the code has 40).

Part	Spec (pt)
Band pages 2–8	Height 93, NAVY, padding 0 42. Behind it, the cover photo in greyscale at 20% opacity. react-pdf has no CSS filter, so bake it into a PNG asset. Left side: eyebrow "CONCIERGE PROPERTY PROFILE" H700 7.5, ORANGE, letterSpacing 1.2 · address H800 18, white, marginTop 7 · city · APN in W 9.4, white at 80%, marginTop 3. Right side: white logo at height 23. No title or lede under the band.
SectionBar	Background #EDF0F4, borderLeft 2.25 ORANGE, padding 9. Uppercase text in H700 9.75, NAVY, letterSpacing 0.8. This is every section heading, e.g. "OWNER, ADDRESS & LEGAL DESCRIPTION". It replaces both Head and eyebrow.
Row	White background, no fill . borderBottom 0.75 #E6E9EE, padding 3.75 7.5, text W 9.75. Label in W700 ORANGE , column width 112.5; value in W500 ink #1A1F2B. The 4-column variant (112.5 / 1fr / 112.5 / 1fr) has a MUTED W500 second label. A missing value prints "—" in #8A94A3.
NavyStrip	NAVY, paddingVertical 9 (7 on page 6), 4 equal cells, each with padding 0 12 and borderLeft 0.75 white at 18%. Label H700 7.5 ORANGE, letterSpacing 1. Value H800 14.25 white, marginTop 4.
StatBox	Background #F6F7F9, borderTop 2.25 in a type colour, padding 9 10.5, marginRight 7.5 (never gap). Number H800 18 NAVY; label W 8.6 MUTED. Type colours: deed NAVY · mortgage #4A6FA5 · release/assignment #8A94A3 · foreclosure ORANGE.
Footer	Not a navy bar. White, borderTop 0.75 BORDER, padding 10.5 42, W 7.9 MUTED. Left: "Data deemed reliable, but not guaranteed. Pacific Coast Title Company. All rights reserved." Right: "n of N". Remove "SiteX Title Profile_144 · Template v3" from the page; keep the template version in the row metadata only. Pages 2–8 only; the cover has no footer.

Body: paddingTop 19.5 below the band, 15 between sections, one footnote line per page in W 8.25 MUTED ("—" means the item was not included in the county record we received.).

3 • Page by page

Page	Built today — remove	v6 — build this
1 Cover	Top bar, 320 pt photo or map with an address band, white panel with a small title, the orange rule, and a footer.	Full-bleed photo 471 tall (fallback #2A3A5C, never the comp map). Logo top-right at 22.5/42, height 23. A navy block overlaps the photo by 72: width 560, height 241.5, padding 29 42. Inside it: "CONCIERGE PROPERTY PROFILE" H700 11.25 ORANGE, letterSpacing 2 · address H900 30 white · city H 18.75 white at 82%. Under it, a #222A48 panel 530 wide that fills to the bottom edge, with two columns: PREPARED FOR / PRESENTED BY (W700 8.25 #D46744), name W700 14.25 white, line W 10.5 white.
2 Thank you	Three paragraphs written in code, the "DISCLAIMER pending / not for external distribution" box, the signature rule.	paddingTop 67.5, max width 420. "Thank you" H800 22.5 NAVY, then an orange rule 36×2.25 (margins 13.5 / 22.5). v6's three paragraphs in W 11.25, lineHeight 1.7, 13.5 apart. Sign-off: "On behalf of Pacific Coast Title Company," MUTED · rep name W700 13.5 NAVY · email · phone.
3 Details	Lede sentence, THE HOUSE / THE LAND columns, legal tiles, owner tiles, last-sale tiles, "house covers", market value, FIPS.	Three sections. Owner, address & legal: primary and secondary owner, site address, mailing address · APN / county · tract / lot · census tract / page grid · brief legal. Beds, baths & sq ft (4 columns): beds / year built · baths / sq ft · garage / lot size · pool / zoning, then property type. Most recent transfer: recording date / document # · sale amount / document type. Then the footnote.
4 Tax	Lede, the grey "Assessment data only" box, assessment tiles, the installment table with a "Late after" column, the "share of assessed value" and "assessed year" tiles.	SectionBar "PROPERTY TAX · year", then a NavyStrip: annual tax · tax year · tax rate · TRA. Installments: two StatBoxes, each with label, amount H800 16.5 and "Due date", no status and no "late after" . Assessed value: a 9 pt bar split land NAVY / improvements #4A6FA5, then rows for land, improvements, total (bold NAVY value) and homeowner's exemption. Special assessments & bonds: a table with columns issued for / payable to / matures. The supplemental note goes in a #F6F7F9 box with a NAVY left rule, then the "as of" footnote. On the SiteX-only layer, render the same parts, leave out the sections that have no data, and put the reason in the footnote line instead of a box.

Page	Built today — remove	v6 — build this
5 Transfers	Lede, a two-column date list, the vesting row in solid navy.	SectionBar. A navy card: "CURRENT VESTING" W700 8.25 ORANGE, owners H700 12.75 white · right side "Deed · date" W700 11.25 · "Document # ... · held N years". Four StatBoxes. One full-width table , newest first, with columns RECORDED (W700) / DOCUMENT # / TYPE (6 pt dot in the type colour) / flag. The header row is ORANGE W700 8.25 over a 1.5 NAVY rule. Foreclosure rows get a #FEF3EC background and "SEE NOTE"; the vesting row gets #EEF2F8 and a navy "CURRENT OWNERS" chip. Then the note box, then the footnote. For histories over ~16 rows, let the table break to a continuation page with the band repeated.
6 Comp summary	Lede, tiles, the per-comp list with "nearest" and "highest sale" tags, and a 250 pt map.	paddingTop 12. SectionBar + map at 187.5 . SectionBar + NavyStrip: sales · median sale · median \$/sq ft · sold. Then a LOW / MEDIAN / HIGH table (the median column filled #EEF2F8) for sale price, \$/sq ft, living area, beds, baths, year built, lot size. Criteria of search goes back on this page: five small StatBoxes (value H800 11.25), then "25 returned → 5 met → 5 shown · Criteria were not loosened to show more."
7 Comps	A heading sentence and label/value tile stacks for each comp.	SectionBar, then one bordered card per comp, 10.5 apart. Row 1 is headers on #F6F7F9: No. / Date sold / Sale price / Sq ft / \$/sq ft / Beds / Baths / Yr built / Distance (ORANGE W700 8.6). Row 2 is values (W 9.4, price bold). Row 3 is the address (bold) on the left and land use on the right. Then the footnote.
8 Plat	"Parcel map and sources", a 300 pt map, the criteria tiles, the sources list.	SectionBar "PLAT MAP · APN ...", then the map filling the rest of the page (flexGrow, objectFit: contain) on #F3F5F8. Nothing else. With no map, the footnote line says why.

4 • Decisions the code overrode — reverse them

Disclaimer is not missing. The wording is on v6 page 2, taken from the Stonybrook customer sample. Set INSURANCE_DISCLAIMER to those two paragraphs and delete the "not for external distribution" box. That box is currently printing on customer PDFs.

Price per sq ft = sale price ÷ living area, for the subject and for every comp. The comment refusing to calculate it goes. The footnote reads "Price per sq ft is the sale price divided by living area."

No lede sentences. "A single-family home built in 1949, assessed at..." and "Four sales, all within..." are not in v6. Section bars carry the structure.

Explainer boxes become one footnote line. This covers "Assessment data only", "Book and page references..." and the installment-halving note.

Letterspaced eyebrows are not styled that way in v6. "T H E H O U S E" in the extracted text shows the tracking is too wide. Section bars use 0.8 pt tracking.

6 • Round two — against 1358-5th-Street.pdf (30 Sep)

The rebuild is on the right parts. What remains is on the cover and page 4, plus one row on page 3. Values in points.

COVER

- White logo, not the dark one.** The code swaps in PCT_LOGO_DARK when a photo is present because the white mark disappeared against sky. v6 solves that with a fade the build never drew: a navy overlay on the top **90 pt** of the photo, `rgba(27,42,74,.7)` at the top edge to transparent at 90. react-pdf has no CSS gradient on a View; draw it as an `<Svg>` with `<LinearGradient>` positioned absolute over the photo, then the white logo on top. Delete the dark-logo branch.
- Centre the navy block's text.** v6 centres eyebrow / address / city vertically inside the 241.5 pt block (`justifyContent: 'center'`). Build top-pads 29. Address `marginTop 12` (build 14), city `marginTop 7.5` (build 8), address `letterSpacing -0.45`, `lineHeight 1.08`.
- Prepared / Presented panel.** Two columns centred vertically in the 530 × remaining-height panel, 30 pt column gap, padding 0 42. Under each name, **one line** in full white W 10.5: date for Prepared for; "email · phone" joined with " · " for Presented by. No 75% opacity. Company, when present, sits between name and date.

PAGE 4 • TAX

Built today	v6 — change to
PROPERTY TAX · 2025	Fiscal year: PROPERTY TAX · 2025–2026 (en dash, <code>`\$y-\$y + 1`</code>). Same in the NavyStrip TAX YEAR cell.
INSTALMENTS · "instalment" in the footnote	INSTALLMENTS / "installment" — US spelling throughout.
NavyStrip with four cells; TAX RATE and TRA print "—" on the SiteX layer.	Drop cells with no data — a two-cell strip (ANNUAL TAX · TAX YEAR) is right. Label the fourth cell TAX RATE AREA , not TRA. Half a navy strip of dashes is the empty-shell v6 forbids.
StatBox: amount on top, "First · due Nov 1, 2025" beneath.	Order inverted. Each box (<code>#F6F7F9</code> , <code>borderTop 2.25 NAVY</code> , <code>padding 10.5 12</code>): label 1ST INSTALLMENT in W700 8.25 ORANGE <code>letterSpacing 0.5</code> · amount H800 16.5 NAVY <code>marginTop 4.5</code> · Due 11/01/2025 in W 9.4 MUTED <code>marginTop 3</code> . Boxes 7.5 apart. Not a StatBox — make it its own part.
Assessed bar full width; Land / Improvements rows have no swatches; "Total assessed" plain on the SiteX layer.	Bar inset 9 pt each side (<code>marginHorizontal 9</code>). A 6 × 6 pt square before "Land" (NAVY) and "Improvements" (<code>#4A6FA5</code>), 5 pt gap to the label. Row reads Total assessed value , value W700 NAVY, on both layers.
Footnote: "instalment amounts, exemptions, special assessments and bonds were not available" — printed under two installment boxes.	Contradicts the page. SiteX-layer footnote: "Installments are the annual amount split per California statute. Exemptions, special assessments and bonds were not in the record we received{, as of DATE}{ · COUNTY County}. — means the item was not included in the county record we received."

PAGE 3 • DETAILS

- "Most recent transfer" has a third row, *Price per sq ft / Living area*, that isn't in v6 and repeats the square footage from the section above. v6 is two rows: recording date / document #, sale amount / document type. Put price per sq ft on the sale-amount cell as "\$369,000 · \$469/sq ft" and drop the row.

Check before re-submitting: re-render 1358 5th St, rasterise page 1 and page 4 at 816 px, and place each beside v6 pages 1 and 4 printed to PDF. Logo white on a faded photo; text centred in the navy block; one line under each panel name; "2025–2026"; "INSTALLMENTS"; label-amount-due order; swatches; no "—" in the navy strip.

5 • Done when

- The Stonybrook payload is re-rendered through `POST /render`. Each page, rasterised at 816 px wide, is placed beside v6 printed to PDF and matches it: same sections, same order, same sizes within a point.
- 1358 5th St re-renders on the same parts, eight pages, with criteria on page 6.
- No page contains "PAID", "delinquent", "Late after", "pending", "Template v3" or a value estimate.
- `routes.test.ts` and the tax-masking tests are unchanged and pass.
